

## 6 HOUR, HALF HOUR AND QUARTER HOUR

- 1 Say whether the minute hand on the clocks above show  $\frac{1}{4}$  past  $\frac{1}{2}$  past  $\frac{1}{4}$  to o'clock. The first one is done for you.

|           |   |   |   |   |   |
|-----------|---|---|---|---|---|
| a o'clock | b | c | d | e | f |
| g         | h | i | j | k | l |

- 2 For each of the clocks above write the **analogue** time.

|              |   |   |   |   |   |
|--------------|---|---|---|---|---|
| a 10 o'clock | b | c | d | e | f |
| g            | h | i | j | k | l |

- 3 Write the **digital** time on these digital clocks to make them show the same time as the analogue clocks above.

|                                               |                                               |                                               |                                               |                                               |                                               |
|-----------------------------------------------|-----------------------------------------------|-----------------------------------------------|-----------------------------------------------|-----------------------------------------------|-----------------------------------------------|
| a 10:00                                       | b <input type="text"/> : <input type="text"/> | c <input type="text"/> : <input type="text"/> | d <input type="text"/> : <input type="text"/> | e <input type="text"/> : <input type="text"/> | f <input type="text"/> : <input type="text"/> |
| g <input type="text"/> : <input type="text"/> | h <input type="text"/> : <input type="text"/> | i <input type="text"/> : <input type="text"/> | j <input type="text"/> : <input type="text"/> | k <input type="text"/> : <input type="text"/> | l <input type="text"/> : <input type="text"/> |
