This is a photo of two friends who have the same birthday.
Both are 8 years old, but both had only **2 candles** on their cake!

- What is the **date** of their birthday?
- How old will they be when they can have **3 candles** on their cake?

Most years have **365** days.

- How many days would there be in a **leap year**?
- How **often** do leap years occur?
- When is the **next** leap year?
