

ANALOGUE CLOCKS

A digital clock shows how many minutes have passed since the last hour.

This is a **digital clock**.

It has **no** hands.

The first number always shows the **hour**.

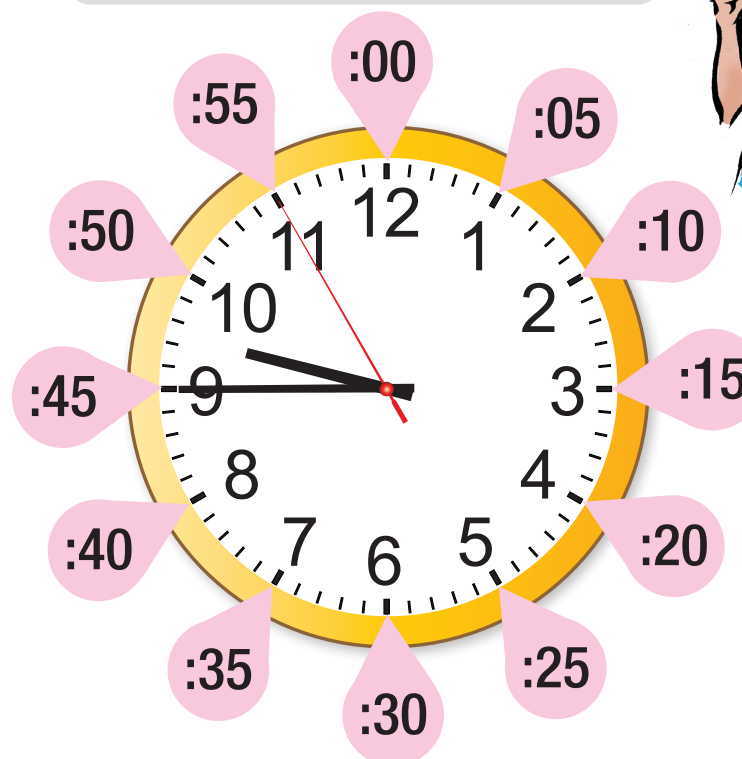

The second number always shows how many **minutes** have gone past since the hour.

On an analogue clock we can count the minutes that have **gone past the hour**.

A thick mark or a number shows every **5 minutes**.

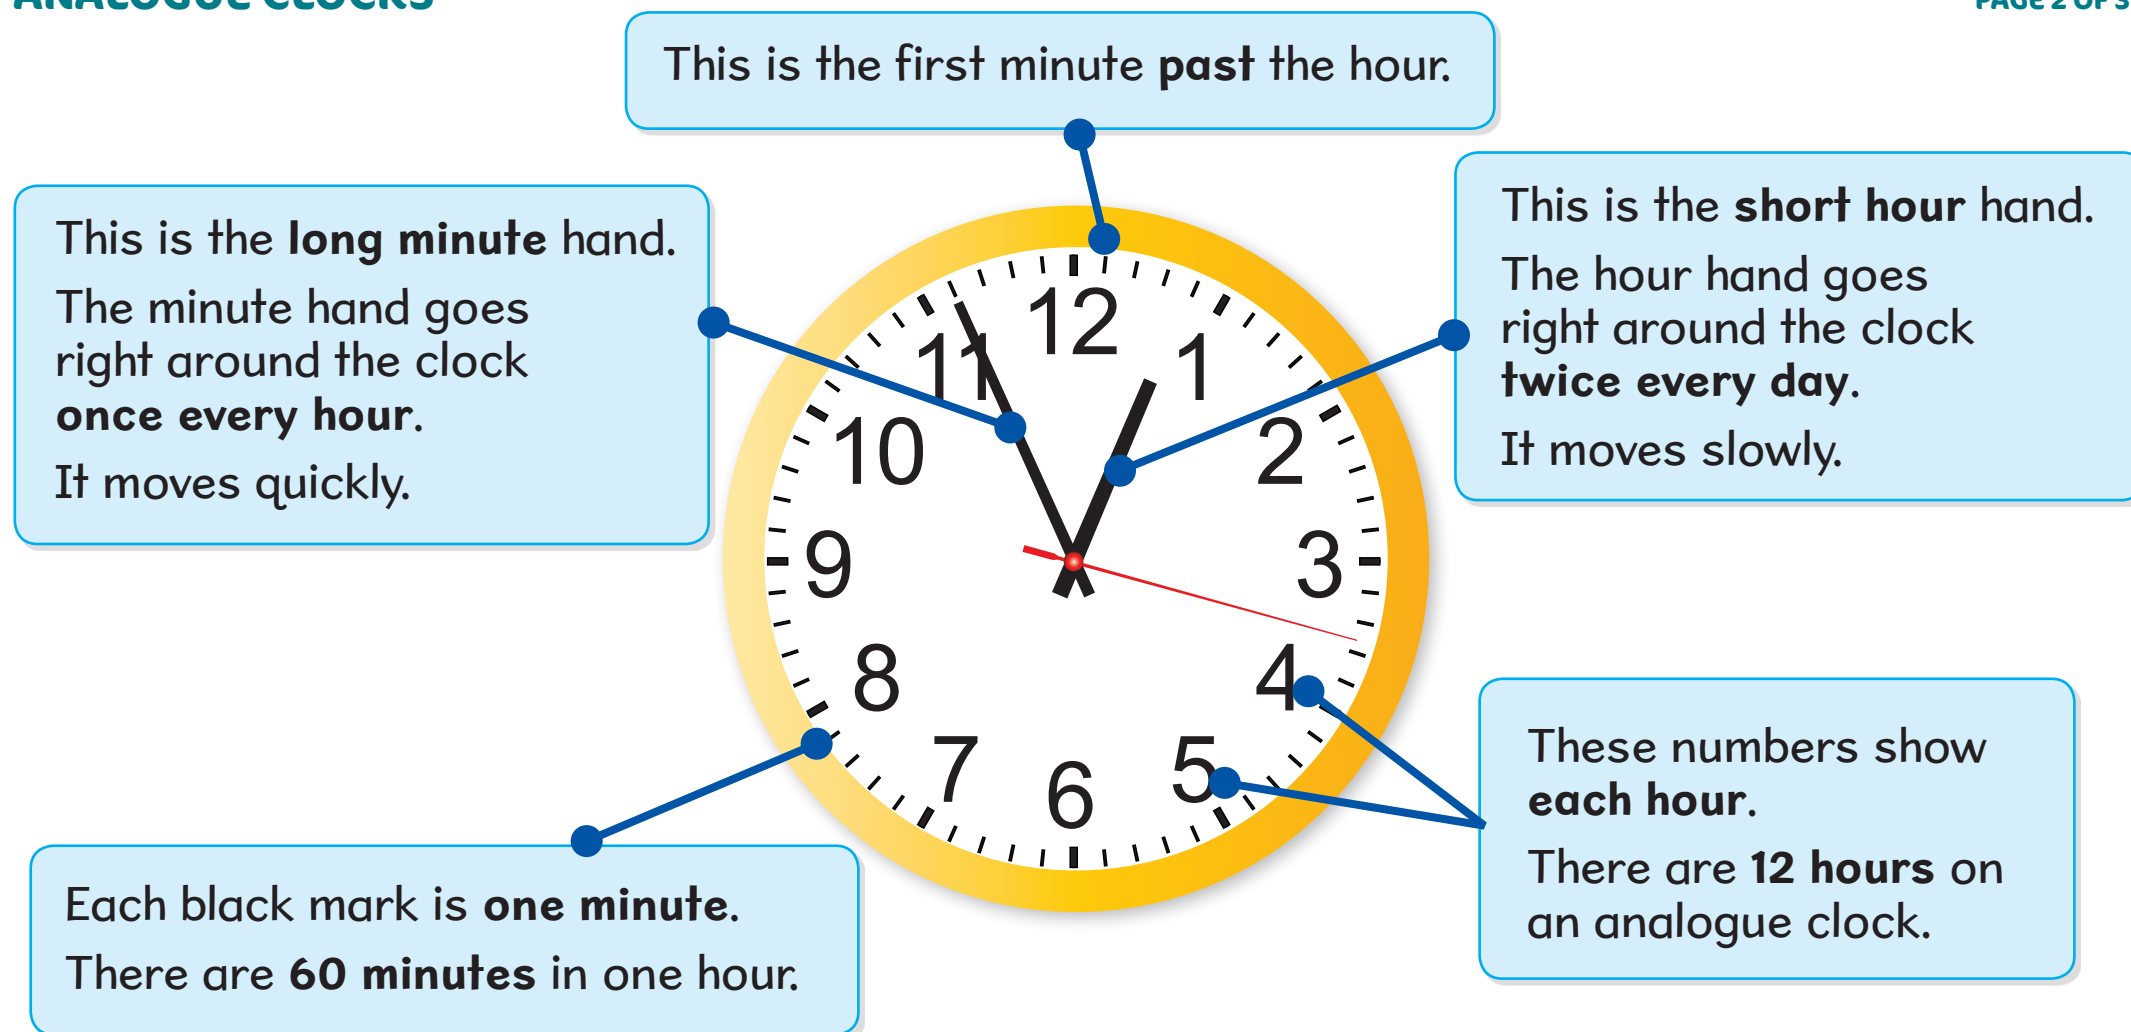

So we can count around in 5s.

This clock shows ____ minutes past 9 or 9: ____.
