

## 1 GUESS MY SHAPE – GAME

### Instructions

- 1 Get into two groups of three or four students.
- 2 One person from one of the groups thinks of a shape.
- 3 The members of the **other** group take turns to ask one question to the person who thought of the shape. That person can only answer “yes” or “no”.

**Examples** “Does the shape have more than four sides?”  
“Does the shape have any square corners?”

- 4 When it is your turn, you can either **ask a question** or **guess what the shape is**.
- 5 If a group guesses the shape before everyone has had 2 turns to ask a question, they get **1 point**. Any groups that don’t guess the shape get **0 points**.
- 6 The groups swap roles after every shape.
- 7 The group who gets the most points after everyone has had a turn at choosing a shape is the winner.
