

6 MAKE A MATCH

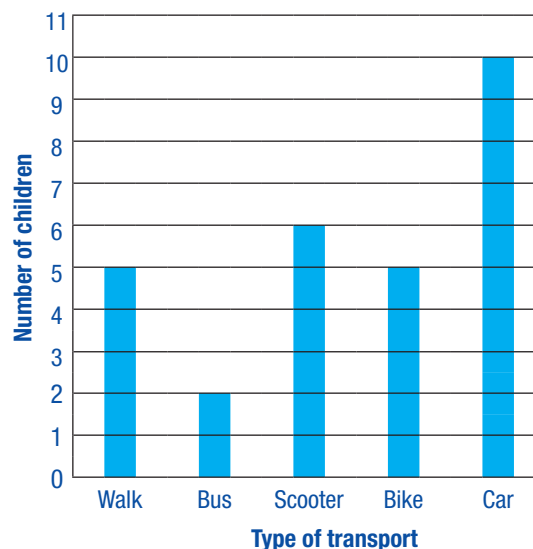

Students were asked to answer some questions.
You can see their answers on these charts and tables.

- 1 Cut out and match **two** graphs or charts that show the **same information**.
- 2 Glue the **title** that matches the information above both.
- 3 For each set, write three sentences about what the charts and graphs show.
- 4 For each set, which graph or chart do you think shows the information most clearly? Why?
