

2 Game

Domino differences

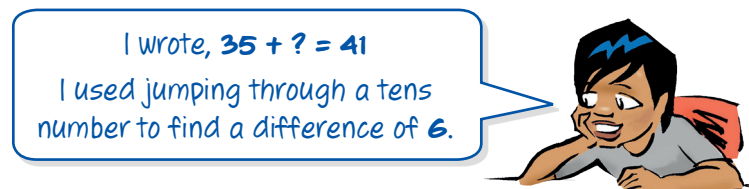

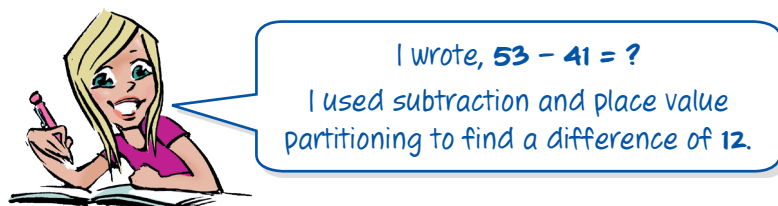

- 1 Turn all the dominoes face down.
- 2 Each player turns one domino over.
- 3 Both players make a two 2-digit number from the two dominoes.

- 4 Each player writes an equation to find the difference between their larger and smaller number.

- 5 Turn the dominoes back over.
- 6 Each player finds the difference between the numbers they made.

Both Jess and Max get **10 points** for getting the **answer correct**.
Jess gets **10 more points** because her answer had the **bigger difference**.

- 7 Continue **steps 2 – 6** until one player reaches **100 points** and **wins** the game.
