

THE CRABS IN THE ROCK POOL

There were **27** small crabs in the rock pool in the morning.
After lunch there were **34** in the pool.
How many more crabs came to the pool?

I used an abacus to help me work out the answer.

What is the answer?

Use an abacus to work out the answer to this problem.

Max counted **16** starfish in the rock pool in the morning.
In the afternoon there were **23** starfish.
How many more starfish came?
