

HOW MUCH CHANGE?

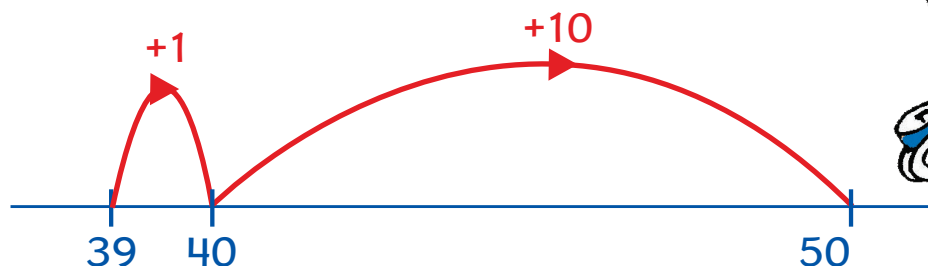

Jess gave the shop assistant \$50 for the boogie board.
The shop assistant worked out the change like this.

$$39 + ? = 50$$

$$39 + 1 = 40$$

$$40 + 10 = 50$$

$$\text{\$1} + \text{\$10} = \text{\$11 change}$$

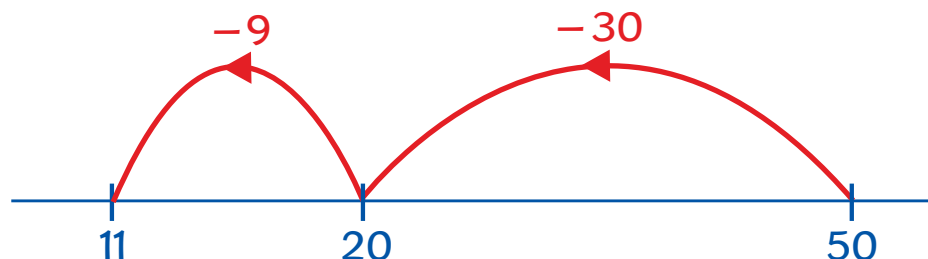

Jess checked to see that she got the correct change.

$$50 - 39 = ?$$

$$50 - 30 = 20$$

$$20 - 9 = 11$$

\$11 change was correct.

Using play money, pretend to be the shop assistant and practise giving change to people who buy things from the beach store.

Beach store price list
