

FIVES AND TENS

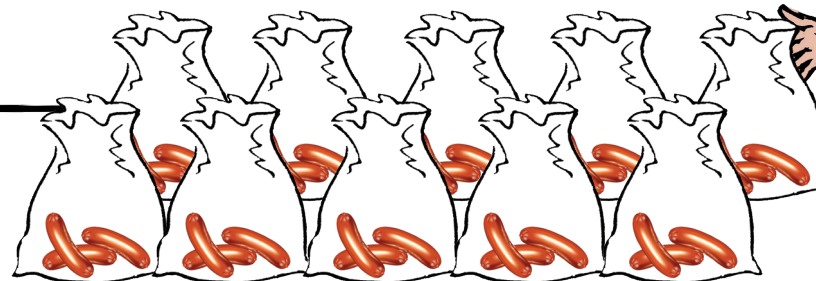

Anika

I have got **5** bags of sausages
with **6** sausages in each bag.

I have got **10** bags of sausages
with **3** sausages in each bag.

Charlie

I think whenever we **double** the
number of bags and **halve** the number
of sausages in each bag, we will still
have the same number of sausages.

Anika

I have **5** bags with **12** bread rolls
in each. I wonder if I will have a
roll for each sausage?

- a Do you agree with Jess? Explain.
- b Will Anika have enough bread rolls for all the sausages?
