

1 I ALREADY KNOW A LOT

- 1 Fill in this chart with the addition facts you already know.
One is already done for you.
Check your answers are correct, and then **shade** these answers a different colour.
- 2 Next work out the answers to the facts you still need to learn.
Write these in making sure they are correct before you begin to practise.

+	0	4	6	3	9	1	8	2	5	7	10
0											
4											
6											
3											
9											
1						2					
8											
2											
5											
7											
10											

If you need to 'work them out', write them here, then practise them a bit more until you 'just know' them.

$$1 + 1 = 2$$
