

1 SUPER SAND-HOPPER

A sand-hopper is jumping along the beach.
The sand-hopper discovers it can use what it knows
about making a little jump to do a super jump!
Find the missing number in each of these to show the
jumps the sand-hopper will make for each super jump.
The first one has been done for you.

Remember 50 is the
same as 5 tens.

a $5 + \underline{5} = 10$

b $50 + \underline{\quad} = 100$

c $500 + \underline{\quad} = 1000$

d $\underline{\quad} + 3 = 7$

e $\underline{\quad} + 30 = 70$

f $\underline{\quad} + 300 = 700$

g $4 + 5 = \underline{\quad}$

h $40 + 50 = \underline{\quad}$

i $400 + 500 = \underline{\quad}$

j $6 + 6 = \underline{\quad}$

k $60 + 60 = \underline{\quad}$

l $600 + 600 = \underline{\quad}$
