

1 HOW MANY ML?

Capacity

A **teaspoon** holds 5 **mls** of water.

1 teaspoon	=	5 mls
1 dessertspoon	=	10 mls
1 tablespoon	=	15 mls

- How many **teaspoons** of water do you need to fill a **tablespoon**?
- Use a teaspoon or dessertspoon to fill a cup with water to measure how much it holds. Record your findings on the table.

	Number of spoonfuls	Cup ml
teaspoon		
dessertspoon		

- Use what you found to estimate how many scoops of the other spoon it would take to fill a cup. Measure to see if your estimate was correct.
