

8 MORE THAN ONE WAY

Find **as many ways as you can** to answer each of these questions.

Give examples of how your answers might be true in real life.

Record each possible answer as an **addition** or **subtraction** equation.

- 1 I put 3 bags of fruit on the scales. Together they weighed 3 kilograms (3000 grams). What might each bag weigh?

- 2 Jess poured 1 litre (1000 ml's) of water into 2 jars so that each jar was full. How much water might each jar hold
- 3 Jess cut 1 metre of ribbon into 10 pieces. How long might each piece of ribbon be?
