

DIGITAL CLOCKS

This is a **digital clock**.

It has no hands.

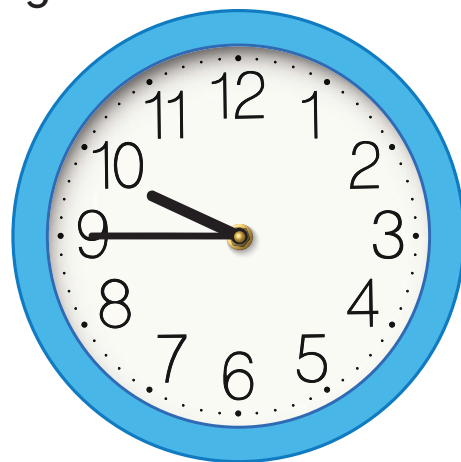

When reading digital time read the first number and then the number after the colon.

This clock would be read, “***Nine forty-five***”.

It means 45 minutes have passed since 9 o’clock.

On an analogue clock it might

be read $\frac{1}{4}$ to _____.

The first number always shows the **hour**

The second number always shows how many **minutes** have passed since the hour

DIGITAL CLOCKS

Read the time on these **digital** clocks.

What would each read in **analogue** time?
