

1 BUILD AND DESCRIBE

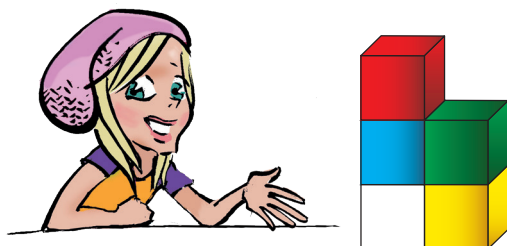

- different coloured cubes
- other 3D shapes

- 1 Sit back-to-back with a partner.
- 2 Make a model using a cube of each colour.
Don't let your partner see your model.

Example Jess made this model.

- 3 Describe how your partner should build your model.
- 4 Ask your partner to show you the model they built from your instructions and then compare it to your original model.
- 5 Swap roles.
- 6 Repeat **steps 2 to 5** with some other 3-D objects that can be joined together to make a model.

Example

Max made this model with cubes, a square-based pyramid and a cylinder.
