

3 Game

- a unifix cube
- coin

- 1 Flip the coin.
Whoever throws the **first** head is the **Fantail** and places the cube on the **Start**.
The other player is the **Tui**.

- 2 Fantail flips the coin and moves the cube following the dotted line to the next branch.

heads - move **up** one branch

tails - move **down** one branch

- 3 Fantail flips the coin **two** more times and moves the cube up or down one branch each time.

- 4 After 3 flips ...

If the cube is on a Fantail branch Fantail takes **one point**.

If the cube is on a Tui branch, Tui takes **one point**.

Fantail's turn is over.

- 5 Move the cube back to the **Start** branch and Tui has a turn flipping the coin 3 times.

- 6 When each player has had 10 turns the game is over and the player with the most points is the winner.

- 7 Decide whether this is a fair game or not?
How do you know?

- 8 Did other teams have the same opinion?

Tui and Fantail
