

4 WHAT COULD I ROLL?

- 1 Jess threw two dice and added the total number of dots to get 8.

What other combinations of dots could she have rolled to make 8?

- 2 Try to discover all the possible combinations that can be made when two dice are rolled and the number of dots is added together.
- 3 Is any total likely to occur **more frequently** when two dice are added together? Why?
- 4 What totals are **least likely** to occur when two dice are added together? Why?
