

A BIG DAY OUT

Decide whether to add or subtract.

Record your thinking using number lines or equations.

- 1 The conservation worker counted 368 birds at the lake at lunchtime.
134 of them were in the water.
How many were not in the water?

2

The tramping hut had 134 people drop by in the morning.

It had another 368 trampers in the afternoon.

How many trampers dropped by the hut altogether?
