

USING A 10 × 10 ARRAY

You can use two pieces of paper to hide the parts of the array that are not helpful.

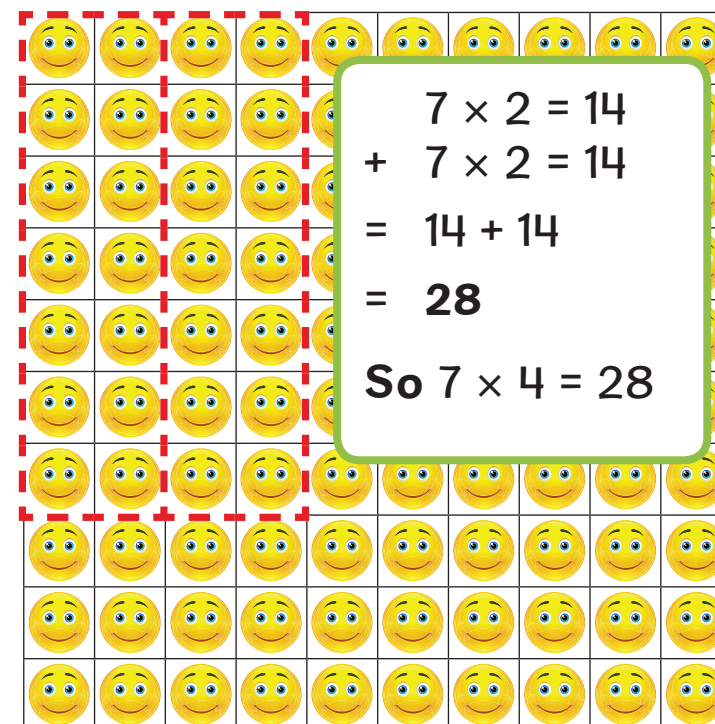

This array now shows 7 groups of 2.

$$7 \times 2 = 14$$

You can draw around the facts you know to help you find out facts you don't know.

This array now shows how to work out 7×4 from $7 \times 2 = 14$.

Use an array to show how doubles could be used to work these out.

a 9×4 from 9×2

b 8×3 from 2×3
