

A LITTLE BIT MORE OR LESS

I can use **two facts** I do know to help me solve one fact I don't know yet.

$$6 \times 2 = 12$$

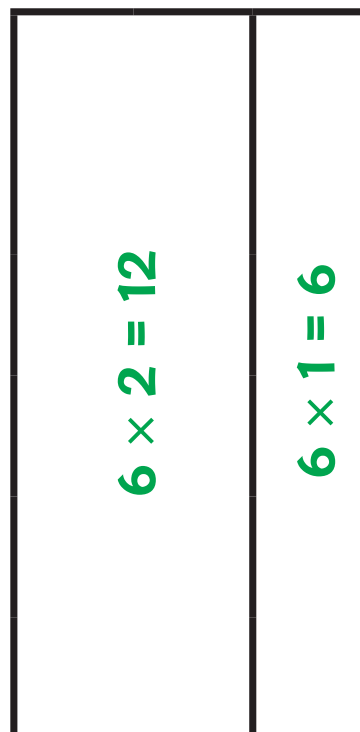

$$6 \times 1 = 6$$

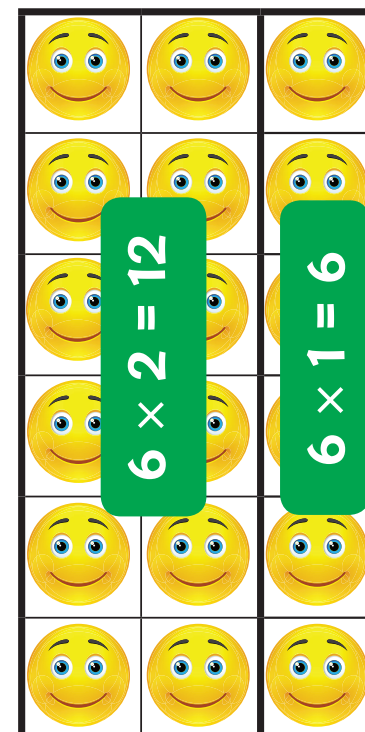

+

$$12 + 6 = 18$$

?

- 1 What is the fact Max didn't know?
- 2 Use arrays to find the answer to 8×3 .
