

USING 10×10 ARRAYS TO DIVIDE

An array can help us solve **division** problems.

Slide two pieces of card back and forth, so you can see the total number of faces in the group.

- a What division problem might the array shown help you to solve?

I need to share 12 stickers between 3 people.

- b How might Jess move the cards on this array to help her find how many stickers each person should get?
