

SEED SALE

Three classes sold seeds for **\$10 a packet** to raise money for a school camp.

- 1 How many **packets** did each class sell to raise these amounts for the camp?
Explain different ways you could work out the answers.

Room 4 \$100

Room 8 \$150

Room 12 \$500

- 2 How many **\$5 notes** would be needed to pay for the seed each class sold?
How could the answers from question 1 help you find the answer to this question?

- 3 How many **\$2 coins** would be needed to pay for the seed each class sold?
Explain different ways you could work this out.
