

**5 PUZZLE**

Jess's mum put twelve \$2 coins into three piles of pocket money.

"Molly" the cat jumped on the table and knocked over the piles, and now nobody can remember how many coins Jess, Emily and Noah were supposed to get.

Show all the ways the twelve coins could have been split between three piles.

Each child got  
at least \$2  
pocket money.

CHAPTER 7 - PG 136
