Empty fraction strips

cut along dotted lines

The grid consists of 6 columns and 10 rows of rectangular strips. The strips are designed to be cut along dotted lines. The columns are defined by vertical dotted lines, and the rows are defined by horizontal dotted lines. The strips are arranged in a way that allows for various mathematical activities, such as comparing fractions, adding and subtracting fractions, and understanding equivalent fractions. The strips are labeled with numbers 1 through 10, indicating the row number. The columns are labeled with letters A through F, indicating the column number. The strips are arranged in a way that allows for various mathematical activities, such as comparing fractions, adding and subtracting fractions, and understanding equivalent fractions.
