

Fraction number lines

cut along dotted lines

Empty fraction number lines

cut along dotted lines

The image contains seven identical horizontal fraction number lines, each designed for cutting and use. Each line is a solid black bar with a dashed line above and below it. Scissors icons are placed at the ends of the dashed lines to indicate where to cut. The number line itself has a '0' at the left end and is divided into 10 equal segments by vertical tick marks. The first segment is further divided into 5 smaller segments by shorter tick marks, effectively creating 15 equal intervals along the entire line.
