

3 Game

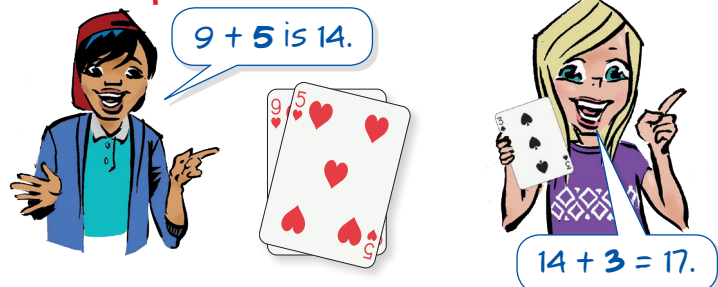

Twenty one

- playing cards:
 Ace – 10
 (Ace is one)

- 1 Deal out **all** the cards (face down) to the players.
 All players turn over their top card.
 The player with the **lowest card** starts.

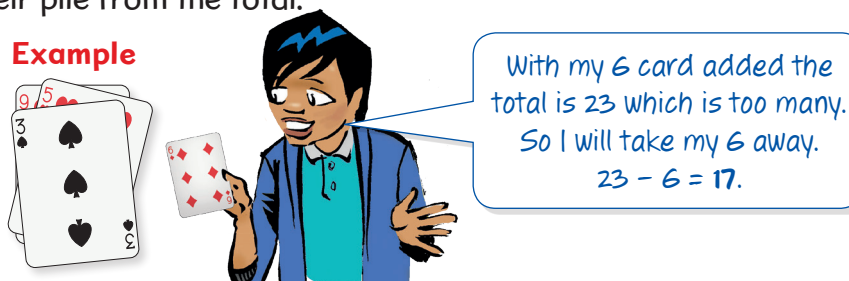

- 2 Each player takes turns to put the number on the top of their pile **face up** on a pile in the centre of the table.
 They **add the number** on their card to the **total** of the cards already there.
 The rest of the players **check the answer** is correct.

Example

- 3 If a card is added and the total is a number **over 21**, then the next player **subtracts the number** on the card at the top of their pile from the total.

Example

- 4 The winner is the player who adds or subtracts to make **exactly 21** first.
