

GRANNY CRINKLE'S KITTENS

- 1 Create a word problem about Granny Crinkle's kittens for each equation.

If we know $3 + 4 = 7$

We know $4 + 3 = 7$

And $7 - 4 = 3$

And $7 - 3 = 4$

- 2 Write a family of facts for $? + 27 = 59$

- 3 Which of the four facts you have written for **question 2**, would you use to find the answer? Explain.

Family of facts also work with bigger numbers.

This means that an equation like: $33 + ? = 74$,
can also be written as: $74 - 33 = ?$
