

SAME DIFFERENCE

$$124 - 79$$

Why is the difference still the same?

The **red** and **blue** blocks are the same length.

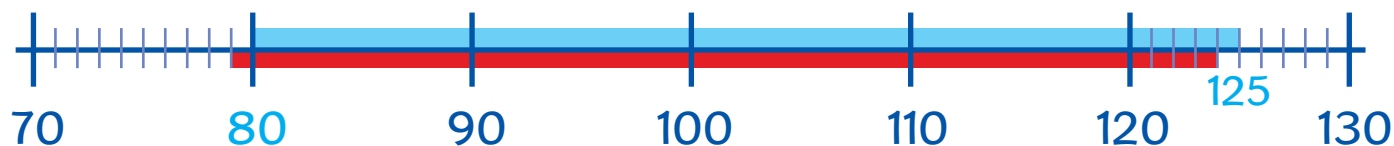

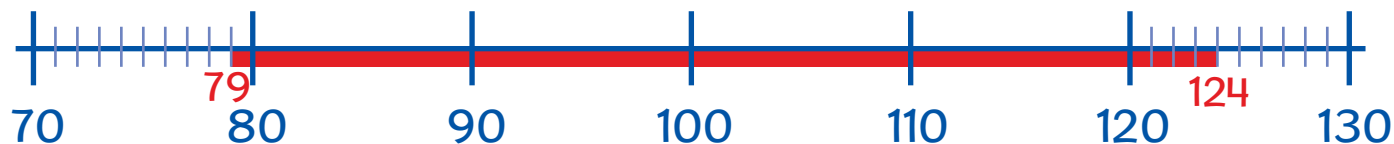

The **blue block** is the **red block** moved one space to the right.

$$\text{So } 124 - 79 = 125 - 80$$

$$124 - 79$$

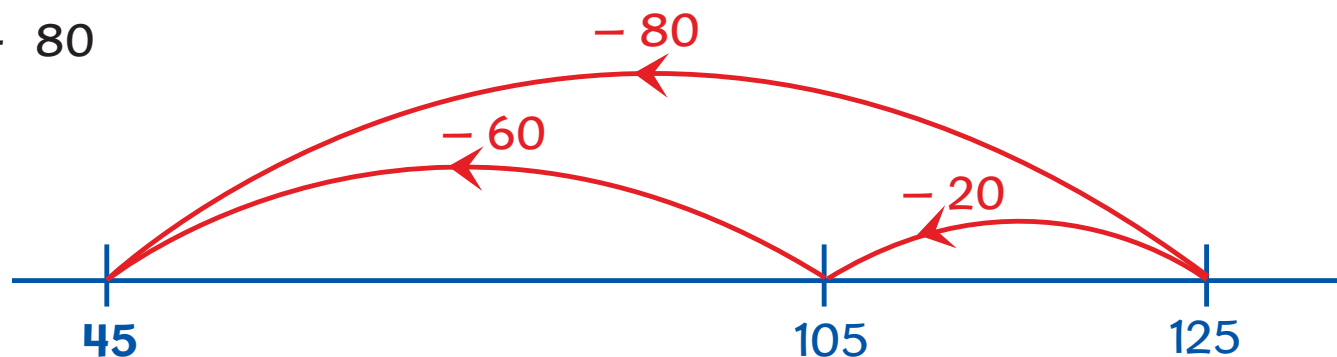

Why is the difference still the same?

The **red** and **blue** blocks are the same length.

The **blue** block is the **red** block moved one space to the right.

$$\begin{aligned} \text{So } 124 - 79 &= 125 - 80 \\ &= 45 \end{aligned}$$

Find the answer to $587 - 248$.
