

A BIT MORE OR A BIT LESS?

$8 \times 6 = ?$

$$\begin{aligned}
 8 \times 6 &= (8 \times 5) + (8 \times 1) \\
 &= 40 + 8 \\
 &= 48
 \end{aligned}$$

or $6 \times 8 = (5 \times 8) + (1 \times 8)$

$40 + 8 = 48$

I know $5 \times 8 = 40$ so
I want to use this.

Split these up into tables you know.

a 9×4

b 8×9

c 7×11
