

BEST WAY

8×17

6×15

28×8

7×120

Choose one multiplication from the box.

As a group, find as many different strategies as you can to work out the answer.

Prepare a presentation for the rest of the class, explaining each strategy step by step.

You could use cartoons to explain the steps.

Take a class vote on which way they liked best for each multiplication.

You could show the results on a graph.
