

FEEDING TIME AT THE ZOO

Jack, the keeper, has 20 bananas to feed to the monkeys.

There are four monkeys to feed.

If they each get the same, how many bananas will each monkey get?

$$4 \times 5 = 20$$

so $20 \div 4 = 5$

Each monkey gets 5 bananas.

FEEDING TIME AT THE ZOO CONTINUED

PAGE 2 OF 2

Use the array to work out how many bananas each monkey would get if Jack has

- a 21 bananas to feed 3 monkeys
- b 36 bananas to feed 6 monkeys
- c 42 bananas to feed 7 monkeys
- d 48 bananas to feed 8 monkeys
