

6 MIXED UP

- 1 In the following story the measurements are in the wrong places.

Rewrite the story so that they are in the right places.

On the way to the park I saw a man who weighed 8 kg, a car that was 4 cm long, a cat with a 20 km tail, a baby that weighed 80 kg and a phone that was 3.5 m wide. The drive to the park was 25 cm long. When I got there I ate my sandwich, which had 6 kg of ham in it, and I then put the sandwich wrapper in my back pack which then weighed 100 g.

- 2 Write your own mixed up story and give it to a partner to rewrite.
