

1 DRAW AND DESCRIBE

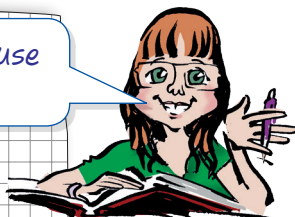

1 Emma drew this triangle using squared paper.

- squared paper or a geoboard

My triangle is isosceles because it has two equal sides.

Emma

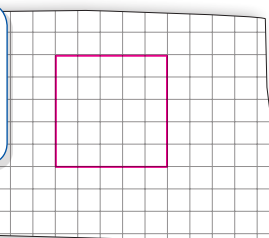

- Draw each of these triangles and say how you know what sort it is.
 - scalene
 - isosceles
 - right-angled
- Can you draw an equilateral triangle on squared paper without measuring? Explain.

2 Maia drew this four-sided shape.

Maia

It is a square because it has four equal sides and four right angles.

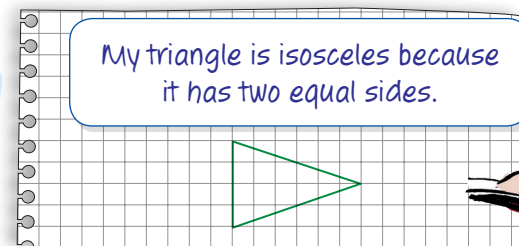

- Draw each of these shapes and say how you know what shape it is.
 - rectangle
 - parallelogram
 - trapezium
 - hexagon
- Can you draw a rhombus on squared paper without measuring? Explain.
