

1 MORE ESTIMATION PRACTICE

For each of these, write down

- the calculation needed for the answer,
- an estimate of the answer, and whether you think it will be higher or lower than the actual answer.

- a At a concert there were 4567 people on the left of the stage, 5098 on the right, and 8976 in front of it.

How many people were at the concert altogether?

- b At an orchard in Central Otago 5467 nectarines, 2098 apricots and 3498 peaches were picked in one week.

How much fruit is this altogether?

CHAPTER 2
