

3 ESTIMATING STATISTICS

Make an interesting article for your school newsletter or class blog using estimated values for these.

- a the number of left-handed students in the school
- b the number of students in your school with each eye colour
- c the number of students who own pets
- d the number of students in your school who own their own mobile phone

You could send an e-mail to each class teacher and ask them to collect actual numbers from their class for you.

Round the numbers given and make an estimated total for each item.

You could draw a graph to show the results.
