

Body shapes

- This picture shows a statue of humans made into a cube. (Don't try this at home!) Try to find a way that your group can make a 3-D shape with your hands or bodies.
- You could find 3-D shapes in real life and draw or take photos of them. Share your drawings or photos with your group. Try to name as many of the shapes as you can.
- Which group made or found the most 3-D shapes?
