

Over or under?

a

I need 19 m and 14 m of wood for my woodwork project.

That's about $20\text{ m} + 10\text{ m} = 30\text{ m}$.

If Jess buys 30 m will she have enough?
Explain.

b

When I am ordering pizza it is best to overestimate because I don't want to run out.

What does Max mean?

- Think of some other situations where an overestimate is needed.
Think of some situations where an underestimate would be helpful.
