

● **How would you do it?**

Hannah, Will and Anya were given this problem to solve.

Hannah

I started this table to help.

Game 1	Game 2
0	32
1	31
2	30
3	29
4	

Problem

A netball team scored
32 points in two games.

What might they have
scored in each game?

Will

$$g + 32 = 32$$

$$g + 31 = 32$$

$$g + 30 = 32$$

$$g + 29 = 32$$

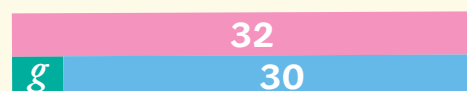

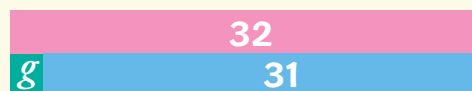

$$g + 28 = 32$$

I started writing
these equations.

Anya

I drew some strip diagrams.

How would YOU do it? Why?
