

WHICH STRATEGY?

Divide into groups.

Set a timer for 5 minutes.

Discuss the most efficient strategy to use for each of these.

You will need to justify your choice.

- 1 If you make a donation of more than \$2 to **Save the Kiwi**, you get \$5.60 off the admission to “Track a Kiwi”.

How much is the admission then?

- 2 If you want breakfast included it is an extra \$12.90.

How much, including a donation of \$3, would it be for you to “Track a Kiwi”?
