

REMAINDERS

Some divisions leave a remainder.
What do you do with it?

Problem 1

The SPCA wanted to divide 22 cats needing homes into enclosures that had space for 5 cats at one time.

How many enclosures can they fill?

What should be done with the left over cats?

Problem 2

The SPCA was given a donation of \$347.

They wanted to share the money equally between the five groups of animals they had at the centre.

How much would each group of animals get?

What should be done with the left over money?

Problem 3

A very ill dog was given some medicine.

There was 126 mL in the syringe to be divided equally into 8 doses.

How much should be given at each dose?

What should be done with the left over medicine?
