

CHAIRS

1 There are 30 chairs in this picture.

a

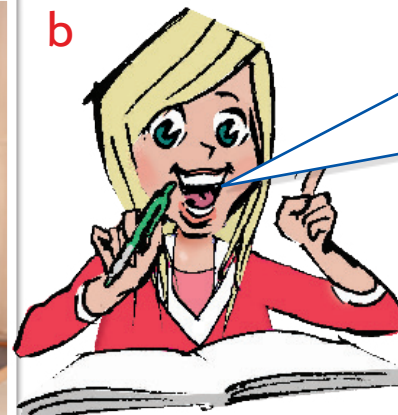

I want rows of
10 chairs.

How many rows
will there be?

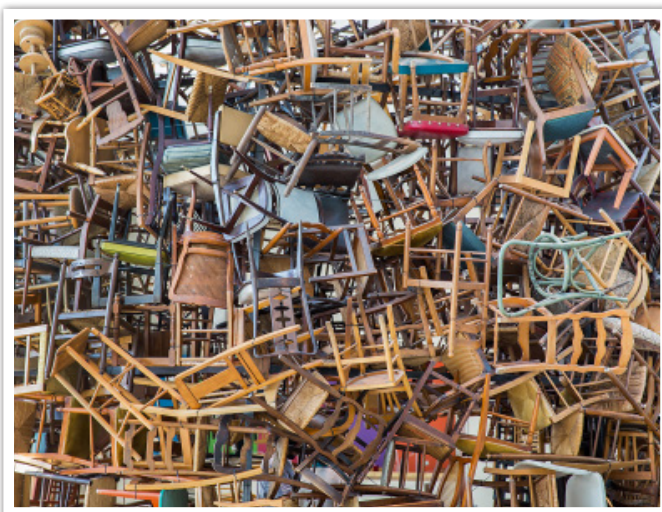

b

Now I think rows of 5
chairs might be better.

How many rows
would there be now?

2

4200 dumped chairs were repaired
to be reused by a charity.

They packed the chairs up to be
distributed in groups of 6.

How many groups would there be?
