

YOUR CHOICE

PAGE 1 OF 2

Finish each way of solving the equation and decide which way you like best and why.

1 $7 \times 18 = (7 \times 10) + (7 \times \underline{\quad})$

$= \underline{\quad} + \underline{\quad}$

$= \underline{\quad}$

What is the name of this strategy?

OR

2 $7 \times 18 = (7 \times 20) - (7 \times \underline{\quad})$

What is the name of this strategy?

OR

3 $7 \times 18 = 7 \times 9 \times \underline{\quad}$

$= \underline{\quad} \times \underline{\quad}$

$= \underline{\quad}$

What is the name of this strategy?
Is there any other way you could solve 7×18 ?

YOUR CHOICE

Finish each way of solving this equation and decide which way you like best and why.

4 $78 \div 6 = (60 \div 6) + (\text{---} \div 6)$

$= \text{---} + \text{---}$

$= \text{---}$

What is the name of this strategy?

OR

5 $78 \div 6 = ?$

$6 \times 10 = 60$ and $6 \times \text{---} = \text{---}$

so $6 \times \text{---} = 76$

so $78 \div 6 = \text{---}$

What is the name of this strategy?
Is there any other way you could solve $78 \div 6$?
