

HOW CAN YOU TELL?

Which operation, $\times$, $\div$, $+$ or $-$ will you need to use for each of these?

Explain how you can tell.

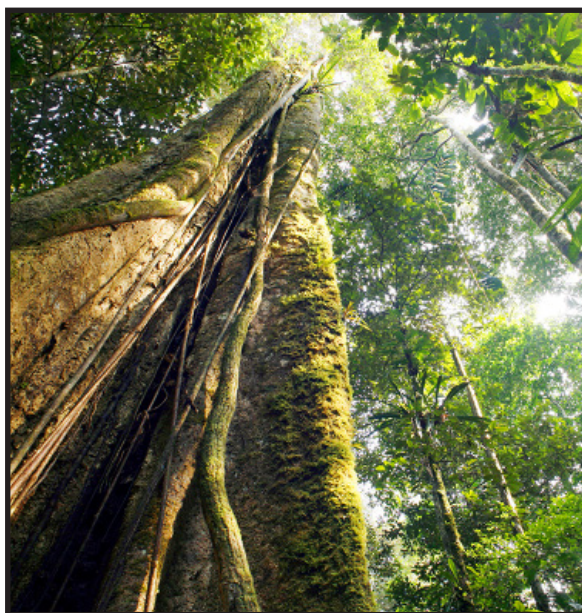

- a A beetle in the rainforest climbed 35 cm up a tree each day for a week.

How far up the tree did she climb over the week?

- c One tree in the rainforest was home to 23 monkeys and 54 birds.

How many creatures is this altogether?

- b It rained steadily for one week in the rainforest.
If 224 mm fell in a week, how many mm fell each day?

- d In one section of rainforest there were 12 078 hectares. 3897 hectares of trees were cut down for farming.
How many hectares of trees were left?
