

WHICH WAY IS MOST EFFICIENT?

PAGE 1 OF 2

In groups, discuss the most efficient way to do each of these.
Be ready to defend your choice !

- 1 There are 507 breeding pairs of yellow-eyed penguins in the South Island.

There are another 153 on Stewart Island.
Altogether there are 1934 breeding pairs
in New Zealand.

- a How many breeding pairs are
there in the South Island and
Stewart Island?
- b How many breeding
pairs are elsewhere?

WHICH WAY IS MOST EFFICIENT?
