

DOUBLE UP

PAGE 1 OF 2

There are 3 bikes for every 5 students in the bike stands.
 How many bikes are there if there are 600 students?

DOUBLE UP

PAGE 2 OF 2

Draw a double number line to work these out.

- 1 a Maddie made a batch of 12 muffins.
She needed two trays for the batch.
How many trays would she need for four batches of muffins?
- b For two of the batches she needed 800 g of flour.
How much flour would she need for all four batches?

- 2 a Greyson was making mini pizzas.
Four pizzas used 200 g of cheese.
How many grams of cheese would
be needed for 12 mini pizzas?

- b Only three mini pizzas could fit in the oven at once.
They took half an hour to cook.
How long would it take to cook 12 mini pizzas?
