

TRUE OR FALSE?

Decide if these statements are true or false.

TRUE

- 1 A quadrilateral has 4 sides
- 2 A kite is symmetrical
- 3 A parallelogram has just one pair of parallel sides
- 4 A trapezium has just one pair of parallel sides
- 5 A square has 4 lines of symmetry
- 6 An equilateral triangle has exactly 2 lines of symmetry
- 7 A rhombus has 4 equal angles
- 8 An arrowhead (or delta) has exactly 2 equal sides
- 9 The diagonals of a rhombus are both lines of symmetry
- 10 A triangle can have a reflex angle
- 11 A quadrilateral with 4 equal sides must be a square

FALSE
