

HORISING AROUND

This table shows the mean height and weight of 20 different breeds of horses.

Put this data into a spreadsheet.

Draw graphs to help you answer these questions.

- 1 What proportion of horses weigh more than 500 kg?
- 2 Is there any relationship between the height and weight of a horse?
- 3 How many horses in this table have a height greater than 14 hands?

Weight (kg)	Height (hands)
500	15-3
499	16
513	16-2
567	16
635	14-2
907	17
454	13-5
363	12-3
470	14-3
32	8
590	17-2
635	17-1
340	13-2
350	15-3
459	14-1
450	14
535	15-3
23	8-2
450	13-8
1179	19

HORSEING AROUND
