

FRACTIONS TO DECIMALS

- 1 Is it possible to shade a whole number of tenths ($\frac{1}{10}$) to show a quarter ($\frac{1}{4}$) on this decimal?

- 2 Shade a quarter ($\frac{1}{4}$) of this decimal.

How many hundredths ($\frac{1}{100}$) are shaded?
Write $\frac{1}{4}$ as a fraction, $\frac{?}{100}$.

- 3 Show using these decimals that $\frac{1}{4} = \frac{2}{10} + \frac{5}{100}$.

Write $\frac{2}{10} + \frac{5}{100}$ as a decimal.
