

1 Game

Time passes

A game for 2-4 players.

- a cube with 1, 2, 3, 4, 5 and 6 on it
- a cube with o'clock, 10 past, 20 past, $\frac{1}{2}$ past, 20 to and 10 to on it
- counters of a different colour for each player

a Take turns to toss both cubes.

b Put a counter on the time made.

Example

Tom tossed

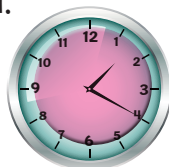

and

The time is 20 past 1.

He put a counter on

c The first player to get
two counters next to each other
is the winner.

The winning counters may be
