

EXTRA TASK SHEET

CHAPTER 11 - CONVERTING BETWEEN MEASURES

2 DISCO FUN

- 1 Imagine you are planning a school disco for 80 children.
- 2 Find three recipes for food and one recipe for fruit punch that you could make. Write down a complete list of the ingredients you would need for the recipes you choose.
- 3 Work out the quantity of each ingredient you will need for the food and drink for the disco.

For example If the recipe is for 8 people you will need 10 times the amount given.

- 4 Write a shopping list of the total quantities of ingredients that you will need. Use sensible units for the quantities.
